

MAINTAINING SOCIAL DISTANCE & PRODUCTIVITY ON THE PLANT FLOOR

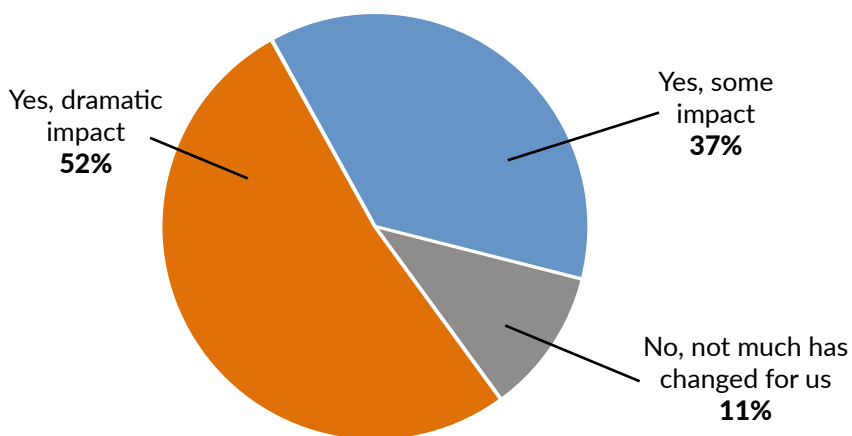

THE CHALLENGE

Provide as much isolation as possible to guard against health risks while effectively communicating in a high-noise environment, reducing incidents and downtime.

CORONAVIRUS IMPACT ON BUSINESSES

89% say the crisis has had an impact on their business, with more than one-half saying it has had a “dramatic” impact.*

THE SOLUTION

Sonetics Wireless Communication Solutions are proven effective tools for enabling effective collaboration at social distance.

HOW IT WORKS

SOCIAL DISTANCE + EFFECTIVE COMMUNICATION

With up to 1,600 feet of range, Sonetics Wireless Headsets enable natural conversation at a safe distance and beyond with conference call-like communication, and advanced hearing protection for high-noise environments.

DO MORE WITH REDUCED LABOR

Optimize and extend the reach of workers by providing a solution that offers hands-free, simultaneous two-way conversation. Keep each worker and supervisor engaged on the plant floor, avoid confusion.

REDUCE DOWNTIME COSTS

Communicate in real-time without stopping work or shutting down equipment. Keep the lines moving by letting employees ask questions and receive notifications without having to step away from their station.

*Food Safety Magazine March 2020 Survey of food processors and service companies.

MITIGATE THE RISK WITH SONETICS

Food Processing Plants use wireless headsets to enhance safety, improve communication, protect hearing, and increase productivity in high-noise environments.
