

FOR IMMEDIATE RELEASE

Sonetics Announces ISO 9001:2008 Certification for Quality Management

Certification awarded for the design, manufacture, sales and service of team communication products for demanding and challenging environments.

Portland, OR (July 14, 2014) - Sonetics®, a leading global provider of team communication products, today announced it has successfully passed the auditing requirements for ISO 9001:2008 and has been granted a certificate of registration for the “design, manufacture, sales and service of team communication products for demanding and challenging environments.”

“ISO 9001:2008 certification reinforces our leadership in the wireless communications industry,” said Simon Broadley, Vice President of Engineering. “The entire Sonetics team takes great pride in passing our initial audit with no major or minor findings. Certification to the ISO 9001:2008 standard adds an additional quality benchmark that we strive to improve upon every day.”

“We are honored to have met such a demanding standard as ISO 9001:2008 with zero nonconformities,” said Michael Heade, Quality Assurance Engineer. “Every employee throughout our organization is dedicated to the pursuit of quality and continuous improvement. By regularly evaluating our quality management system’s performance at every level, we assure our customers that we are committed to providing them with superior customer service and the highest quality products.”

The ISO 9001:2008 quality management standard was developed and published by the International Organization for Standardization (ISO) and establishes standards for evaluation of effective quality management programs for manufacturing companies. Important components of ISO 9001:2008 include customer satisfaction and establishing processes for continuous improvement.
