

ADVENTURE

New standards in value, style & comfort — only from Flightcom!

V90ANR

Whatever adventure you have planned, count on Flightcom's new **Venture headsets** to be with you all the way. Built rugged and packed with features usually found only on more expensive models, the Venture Series delivers the comfort and performance that more than 100,000 pilots around the world have come to expect from Flightcom.

And by the way, they look really cool, too!

FLIGHTCOM
Where dreams take wing. 

Venture Aviation Headsets

V90ANR, V90SP, V90MPH, V70SP, V50ANR, V50SP, V50MPH, V30SP

V90 ANR (Active Noise Reduction) Dual Input Headset

The Venture V90 ANR dual-input stereo headset delivers comfort and performance beyond anything in its class. Weighing in at 17 ounces with super-thick ComLeather ear seals and washable thick polar-fleece head pad, this headset is designed to maintain the comfort demanded by experienced pilots spending long hours in the left seat. With 24dB passive NRR and an additional 14-18dB ANR, noise won't prevent you from hearing radio traffic or using your MP3 and your Sat/Cell phone through the dual-input battery box. The Sure Power system shuts off ANR to preserve battery life when no audio is present, preserving the 50-hour battery life. And the chrome head band with carbon fiber print ear domes put this headset in a class of its own. A heavy-duty padded carrying case is included.

V90SP Passive Fixed-wing Headset

The Venture V90SP Passive Fixed-wing stereo headset delivers top-of-the-line comfort and outstanding performance for pilots who don't need ANR. Like its ANR cousin, this headset weighs a mere 17 ounces and comes with super-thick ComLeather ear seals and washable thick polar-fleece head pad for long-wearing comfort on experienced pilots - or those who are gaining experience. Cockpit noise is tamed with 24dB NRR, with stereo/mono switch and dual volume controls to optimize hearing. The chrome head band and carbon fiber print ear domes set a new standard for looks and class. A heavy-duty padded carrying case is included.

V90MPH Passive Helicopter Headset

The Venture V90MPH Passive Helicopter stereo headset delivers top-of-the-line comfort and outstanding performance for pilots who don't need ANR. Like its ANR cousin, this headset weighs a mere 17 ounces and comes with super-thick ComLeather ear seals and washable thick polar-fleece head pad for long-wearing comfort. Cockpit noise is tamed with 24dB NRR, with stereo/mono switch and dual volume controls to optimize hearing. Plus, we've done the work to add a U-174/U plug with straight cable for helicopter use. The chrome head band and carbon fiber print ear domes set a new standard for looks and class. A heavy-duty padded carrying case is included.

V70SP Passive Fixed-wing Headset

The Venture V70SP Passive Fixed-wing stereo headset delivers an outstanding combination of comfort, performance, and good looks. This headset weighs a mere 17 ounces and comes with supple ComLeather ear seals and washable polar-fleece head pad for long-wearing comfort. Like other Flightcom Venture series headsets, the Venture 70 provides a 24dB NRR barrier against cockpit noise. A stereo/mono switch and dual volume controls optimize hearing. The powder-coated black head band and carbon fiber print ear domes look professional in any cockpit. A lightweight carrying case is included.

V50ANR Dual Input Headset

The Venture 50 ANR stereo headset makes outstanding Flightcom ANR performance widely available with no skimping on other features. The 17 ounce weight, open-cell foam PVC ear seals, wide and comfortable air-pillow head pad, and shallow speaker design make a very comfortable headset. With 24dB passive NRR and an additional 14-18dB ANR, noise fatigue and clear communication shouldn't be an issue. A stereo/mono switch and dual volume controls optimize hearing. The Sure Power system shuts off ANR to preserve battery life when no audio is present, preserving the 20-hour battery life. A powder-coated black head band complements the fresh look of onyx black ear domes. A lightweight carrying bag is included.

V50SP Passive Fixed-wing Headset

The Venture 50 Passive Fixed-wing stereo headset makes Flightcom quality and performance available to pilots and "back-seaters" alike. The 17 ounce weight, open-cell foam PVC ear seals, wide and comfortable air-pillow head pad, and shallow speaker design make a very comfortable headset. With 24dB passive NRR, everyone will enjoy clear communication. A stereo/mono switch and dual volume controls optimize hearing. A powder-coated black head band complements the fresh look of onyx black ear domes. A lightweight carrying bag is included.

V50MPH Passive Helicopter Headset

The Venture 50 Passive Helicopter stereo headset makes Flightcom quality and performance available to rotary pilots. The 17 ounce weight, open-cell foam PVC ear seals, wide and comfortable air-pillow head pad, and shallow speaker design make a very comfortable headset. With 24dB passive NRR, everyone will enjoy clear communication. A stereo/mono switch and dual volume controls optimize hearing, plus we've done the work to add a U-174/U plug with straight cable for helicopter use. A powder-coated black head band complements the fresh look of onyx black ear domes. A lightweight carrying bag is included.

V30SP Passive Fixed-wing Headset

The Venture V30SP Passive stereo headset combines affordable quality, durability, and features for new pilots and passengers young and old. The 17 ounce weight, open-cell foam PVC ear seals, ventilated foam-rubber head pad, and shallow speaker design deliver adaptable fit. The 24dB passive NRR enables clear communication. A stereo/mono switch and single volume control adjust hearing. The powder-coated black head band matches natural black ear domes.

All Flightcom Venture Series headsets sold through authorized dealers include a 3-year warranty to original purchaser against manufacturing defects. See the Flightcom web site or in-box warranty certificate for details. Flightcom Venture Series headsets are available through quality dealers worldwide. Consult the Flightcom web site to locate your nearest dealer.
