

HOW TO MAINTAIN SOCIAL DISTANCE AND COMMUNICATE EFFECTIVELY IN A HIGH NOISE ENVIRONMENT

Sonetics Team Wireless Headsets enable natural conversation at a safe distance by combining conference call-like communication and hands-free operation with advanced hearing protection.

Public Works crews can hear each other clearly even in high noise, eliminating the need for face-to-face communication.

BENEFITS OF WIRELESS COMMUNICATION FOR PUBLIC WORKS

Removes the need for face-to-face conversation while maintaining team communication and collaboration.

Accelerates training by maintaining a “lifeline” of continuous communication between trainees and supervisors.

Minimizes the risk of communication errors from crew members concerned about maintaining social distance.

Higher productivity is realized when instructions are delivered clearly and questions are answered directly in real-time.

Quick deployment avoids work stoppages and ensures that employers remain in compliance with health requirements.

Wireless Communication Solutions for Public Works

Crews use wireless headsets to improve communication, protect hearing, and increase productivity in high-noise environments.

Sonetics Wireless Communication Solutions are proven effective tools for enabling team collaboration at social distance.
